

Chip Perschino

Senior Vice President of Construction

As Senior Vice President of Construction for Edward Andrews Homes, Chip is responsible for the homebuilding operations of the company. With an award-winning career spanning more than 20 years, Chip has completed in excess of 2,000 residential and mixed-use commercial projects.

Chip leads all phases of homebuilding operations and provides strategic direction for developing and implementing effective programs and processes for day-to-day construction operations. He is customer focused and has an innate ability to understand and deliver on customer needs while consistently delivering homes on time and to the highest quality standard.

Prior to joining Edward Andrews Homes, Chip spent 17 years with Atlanta-based John Wieland Homes and Neighborhoods where he established himself as the expert for Atlanta homebuilding standards, setting records for cycle time, cost reduction and customer satisfaction.

Additionally, Chip played a critical role in developing and implementing a quality program for his former employer, which earned the top placement in the iconic global J.D. Power awards for three years running in customer satisfaction and home quality.

Chip is a licensed Georgia general contractor and serves as a leader for the Georgia Power builder panel and Habitat for Humanity. Chip earned a Bachelor of Science in construction management from Central Connecticut State University.
